Subject: Support for Yucca Mountain Site

Part of Records Package / Supplement / Correction

I understand that the scientific and engineering studies performed to date have determined that the Yucca Mountain site meets the proposed guidelines for a geologic repository for spent nuclear fuel. Moving forward with a site is important to allow nuclear energy to continue to provide a significant portion of our energy needs, and to help our country remain strong during this time of heightened national security.

Therefore, I support Energy Secretary Abraham in recommending the site to the president.
Thank you.

John K. Wheeler
